 anniversary of Thomas & Friends. The range features numerous characters in a variety of different themes. They are small sized, each acquiring a 4-wheeled chassis configuration and a hook and loop coupling system. Tender engines have their tenders moulded onto the overall unit, behind their cabs and boilers. The two primary methods of
distribution for the Minis are blind bags and visible packs. The blind bags have individual codes to identify and distinguish which bag contains which Mini. The blind bags releases in 2015 were split into four separate waves, released gradually throughout the year, each with its own unique set of Minis. Play-sets with exclusive Minis and various multi
packs were also released in parts of the world, gradually becoming available internationally during the end of 2015 and early 2016. The themes released in 2015 were: Classics, Robo, Dino, Chillin', Racers, Old School, Neon, Spooky and Metallic, with Christmas and Warriors joining the line-up during the end of the year, as exclusive Minis to 2 multi-
 packs. Mattel also released a cross-over theme, DC Super Friends, that included multiple characters dressed up as various Superheroes and Friends Minis have been one of the most successful toy ranges for Mattel and statistics show, within the first 10 months of 2015, in Walmart Stores
  alone, they sold more than 5 million Minis. Internationally, the Minis have also achieved astounding sales. Because of the immense popularity and demand of the Minis, Mattel continued to expand the ever-growing and highly successful toy range in 2016, incorporating a variety of new themes and characters into the popular toy-line, as well as
creating new Minis for some previously established themes from 2015. The brand new themes introduced for 2016, included: Sweets, Electrified, Sports, Creatures, Graffiti and Core Moments, joined with an exclusive theme for the US/Canada called Tootsie, as well as Glow in the Dark and Insects, was released in late-2016. Mattel continued the
much loved DC Super Friends theme with a plethora of new additions to the line-up. In late-2016, came along the newest cross-over theme SpongeBob SquarePants, that featured a variety of Minis dressed up as popular characters from the hit television show. A majority of the Classics theme was re-released and also received new characters into the
 line-up. Metallic, Spooky and Racers also got brand new additions to their line-up, as well as a few re-releases. Rolling stock was also added to the range for the first time in 2016. Many Play-sets were also released, which contain exclusive Minis, along with 4 (with a fifth released in 2017) small Speedy Launchers, that also arrived with exclusive Minis
 each. The blind bag waves in 2016 contain previously released Minis, titled 'returning favourites' as well as brand new introductions mixed into each series. The codes were re-generated, starting again from Code: 01. 2017 was the third year for the Minis range and Mattel released brand new Minis themes including: Steel, Construction, Aquatic,
 Night Time, Space, Monster and Animals, as well as new characters incorporated into the Classics theme. It was also announced. A new crossover theme was also announced for 2017, that being the Mighty Morphin' Power Rangers and Teenage
Mutant Ninja Turtles. For the first time, road vehicles were added to the range. In 2018, several new Minis themes were introduced. These included a birthday-themed Thomas, Neon Glow in the Dark and Light-Ups. In 2019, themes
 such as Pets, Rainbow, Holidays, Icky, Sushi, X-ray and Medieval were added. Also released were new engines in the Classic theme and a new series of Fizz & Go packs that included tiny animal and human figures. It was confirmed that the Minis range would continue into 2020. This is the first year to feature two waves instead of 4. Wave 1 features
 themes based on Hawaiian, Ice Cream, Ice & Snow, On the Farm, Cowboy, Galaxy, Music and Classic 75th. Wave 2 features themes based on Anniversary, Racing, Recycling, Animals, Vegetables, Fast Food, Three Little Pigs, Aquarium, New Look, Ghosts and Space. 2020 also saw a new packaging method: Each blindpacked Mini now comes in a box
 strapped to a wagon not to dissimilar to those made for the Motorized Railway range, in varying colors in between. 2021 also saw a new wave of Minis introduced, and much like all current Thomas toy lines, the models aim to reproduce a design aesthetic based on the CGI series despite running alongside the Flash-animated reboot. A handful of new
 characters were introduced to the Classics line (Whiff, Rajiv, and Flying Scotsman), all of which are repaints of existing characters. The 24th was released in early 2022. It's possible this could end up as the final wave for the entire brand. This marks the only year to not feature
 any new themes. Classics 2015 2016 Returning Favourites (#) Refers to the 2016/4 Minis Thomas (Code: 40) # Charlie (Code: 40) # Charlie

It
featured a play area containing large versions of the original 2015 series engines. Gallery Trivia Each engine in the blind bags has its own respective item code. This can be used to distinguish a particular model apart. The range was first produced in Thailand having weights inside. Some 2016/4 models continuing into 2017, the production moved to
China onwards, removing the weights. The overall design and make have stayed the same. Classic Diesel 10 was present in both 2015/2. It is unknown why he was repeated. Characters in the blind bag releases can be clearly visible in certain areas of the bag. Multiple prototypes differed from the final model: Classic Gator had dark grey
wheels. Neon Iron Bert had black wheels, thick side stripes and an extra stripe on his top. Racer Spencer had black wheels. Classic Charlie had an unprinted roof. Old School Scruff had a black footplate. Robo Toby has black chassis. Steel Edward's
chassis are light red. Belle's prototype models are exactly the same as Rosie's, and she has handrails on her roof for her 2019 re-release. The only exceptions for this case are her Light-Ups and Monster variants. Classic Toby's model has lighter chassis. Old School Salty's animated version had a grey footplate and grey wheels. Classic Bash and Classic
Dash and their variants (excluding Sports Bash and Creature Dash) had flat wheels. Robo Toby's second prototype had a black smokebox. Fizz N Go James has Thomas' eyebrows. Steel Diesel 10's model is dark brown.
Snake Henry lacks his tounge. Jellyfish Iron Bert's smokebox has stripes. Apple Stanley is dark red. Parrot Millie uses a yellow nose, beard and mouth and a beak. X-Ray Victor's wheels are light gold. Creature Samson does not have a nameplate. Classic Luke's 2017 re-release had an unpainted roof. Night Time Emily's windows are yellow. Space
Scruff had an unpainted roof. Classic Diesel 10's 2017 re-release has lighter chassis. Classic Bertie has a window at the front. Happy Holidays Gordon's chasis are yellow instead of gold. Pop Art Diesel 10 and Camo Rosie
have no eyebrows. Classic Iron Bert's 2019 re-release has a light brown smokebox. Classic Skarloey's 2017 re-release is unpainted. Classic Ferdinand's face is unpainted.

There are a few printing errors on the Minis collectors checklists. 2015/3-4 Special James is missing his checkbox. they do not have any buffer detailing. Emily's Spooky variant has gold printed on her funnel top, while her other variants do not. The DC Super Friends™ 9-Pack 1's prototype version contained Rosie as Supergirl and Millie as Harley Quinn instead of Percy as Robin and Millie as Catwoman. In 2016, the blind bags packaging went through aesthetic
changes. Now each wave acquire their own respective blind bag packaging designs, displaying images on the bags of models included in that particular wave. The bags also received indicators at the top left corner, showing which wave is which. In 2016, all of the blind bag codes were regenerated, restarting at Code: 01 (excluding the 2017 series).
